

Corrections from Mini Defense Panel

Ekekwe Tanyalouise, 20CG028072

1. Project Title: Remove coding conventions and make it centered on what the tool utilizes to solve the problem
2. Remove footnotes from the writeup.
3. Write more extensively on AI, CNN, ANN, and the supersets of LLMs. Write on Why LLMs were chosen for this problem.
4. Write on relevant methods used to solve your problem.
5. List the systems reviewed in the introduction of “Review of Relevant Systems” before writing on those systems.
6. Centralize numbers on pages throughout the writeup.
7. Reduce spaces between paragraphs and titles with other content.
8. Focus more on the science of your topic.
